PROFESSIONAL SUMMARY

UX/UI designer with over three years of professional work, currently at i-Context Pvt Ltd in Colombo. Designs responsive web interfaces in Figma and builds them in ReactJS, Next.js and AngularJS, working with product managers, designers and developers. Portfolio includes three stand-alone UX case studies (Gmail mobile app, Uber Request-a-Ride, university admissions in Sri Lanka) with self-led research, Figma flows and user testing, plus a set of UI design projects. BSc (Hons) in Information Technology, a Diploma in Web Design, and certificates in Web Design and Graphic Design.

CORE SKILLS

Front end: HTML, CSS, SASS, JavaScript, ReactJS, Next.js, AngularJS, Vue.js, Vuetify, Bootstrap, React Bootstrap, Tailwind CSS

Design tools: Figma, Adobe XD, Adobe Illustrator, Adobe Photoshop, Canva, Camtasia, Draw.io, Google Forms, Typeform

AI design workflow: LLM tools throughout the process — ChatGPT and DeepSeek for domain research in the Empathize stage (understanding target demographics); Claude Code and Antigravity for AI-assisted prototyping and production front-end

UX practice: responsive design, cross-browser compatibility, accessibility, usability, style guides, iterating designs from feedback

UX research and process: user surveys, user interviews, Play Store review analysis, thematic analysis, personas, competitive analysis, user flows, wireframes, low and high-fidelity prototypes, Design Thinking

Agile/Scrum: sprint planning, daily stand-ups, sprint reviews, retrospectives

CMS: WordPress

Tools: Git, GitHub, VS Code, Visual Studio, Netlify, Vercel

Languages: English, Sinhala

PROFESSIONAL EXPERIENCE

i-Context Pvt Ltd, Colombo, Sri Lanka	06/2023 - Present
<i>UI/UX Engineer</i>	06/2025 - Present
- Design responsive web interfaces in Figma and build them in ReactJS and Next.js with Bootstrap, React Bootstrap, CSS and SASS, across multiple projects. Also use AngularJS for UI implementation and mobile responsiveness. - Turn wireframes, high-fidelity designs and UX research findings into working screens, alongside product managers, designers and developers. - Check accessibility, usability, cross-browser and cross-device behaviour on web applications, then revise the interface from testing and feedback. - Take part in an Agile/Scrum team: sprint planning, daily stand-ups, sprint reviews and retrospectives.	
<i>Associate UI/UX Engineer</i>	01/2024 - 06/2025
Designed user experiences and built responsive interfaces in ReactJS, Next.js, AngularJS, Bootstrap, React Bootstrap, CSS, SASS and Figma on multiple projects.	
<i>Trainee UI/UX Engineer</i>	06/2023 - 01/2024
Built user interfaces from wireframes and made them responsive on mobile.	
Weboccean Pvt Ltd, Remote	03/2023 - 06/2023
<i>Junior UI/UX Designer</i>	
Created UI components in Figma as part of a remote design team.	
VizuaMatix Pvt Ltd, Colombo, Sri Lanka	08/2021 - 03/2022
<i>Trainee Software Engineer; Intern Software Engineer</i>	
- Coded front-end interfaces in Vue.js and Vuetify, with a focus on mobile responsiveness. - Worked with the development team on responsive web applications.	

PROJECTS

Stand-alone UX case studies (self-initiated, not client work)

Uber Request-a-Ride UX Case Study

8 weeks, mobile app. Figma, Photoshop, Canva. Not commissioned by Uber. Analysed 590 Play Store reviews (04/2025 to 06/2025) and picked out five recurring problems: driver no-shows, surprise fares, poor support, payment errors and GPS accuracy. Built three personas and a user experience matrix, redesigned the flow for each problem, and tested the proposed solutions with users.

Gmail Mobile App Usability Case Study

4 weeks, native Android. Figma, Photoshop, Camtasia. Not commissioned by Google. Surveyed 20 Gmail Android users and read Play Store reviews (06/2024 to 09/2024) to find six pain points, including account switching, search filters and label management. Compared three competing apps, mapped a simplified user flow, moved from wireframes and low-fidelity prototypes to high-fidelity prototypes, and tested with Gmail users.

UGC Admission Flow UX Case Study

6 weeks, web application. Figma, Google Forms, Typeform, Canva. Self-driven, not affiliated with the University Grants Commission. Ran online surveys and interviews with Advanced Level students, undergraduates, graduates and parents, used thematic analysis, and built three personas. Designed a Smart Program Finder flow, built a live demo in Next.js and Tailwind CSS, and tested the prototypes with students, graduates and parents.
